MARK A LIMOSANI, DMD LAUREN TINK, DMD

Recognized among *Aventura Magazine's* Top Dentists, board-certified endodontists Dr. Mark A.

Limosani and Dr. Lauren Tink of Weston/Aventura Endodontic Care are expanding their reach with the opening of a new, state-of-the-art facility in Aventura.

Endodontists are root canal specialists—dentists with advanced training in diagnosing and treating problems inside the tooth. At their practice, patients receive expert care in relieving pain, saving natural teeth, and addressing complex cases. Advanced technology, including microscope-enhanced treatment, CBCT imaging, and in-house sedation, ensures maximum comfort and precision.

Dr. Limosani, a diplomate of the American Board of Endodontics and Fellow of the International Academy of Endodontics, is internationally recognized for his minimally invasive techniques. He earned his dental degree from the University of Montreal and completed his endodontic residency at Nova Southeastern University. As president-elect of the Florida Association of Endodontists, he is curating the 2026 state meeting and pursuing a Mastership In Biomimetic Dentistry. He and his wife, Valentina, are raising three boys in

Hollywood Lakes. Together, through Valentina's bilingual podcast *Mamas Con Ganas*, they inspire audiences in the Latin community and beyond with messages of growth and resilience.

Dr. Tink, also a diplomate of the American Board of Endodontics, is known for her compassionate, patient-centered care. Educated at McGill University in Montreal and Nova Southeastern University, she strongly advocates for saving the natural dentition whenever possible. With a special interest in treating children, she excels in behavior management and uses laughing gas to create a positive experience for young patients. She is active in several South Florida study clubs and approaches endodontics with a comprehensive treatment planning philosophy. Dr. Tink has participated in several veterinary dental missions, providing care to rescued exotic animals. She is deeply grateful to be part of a profession that allows her to make a meaningful impact.

With the opening of their new Aventura location, Drs. Limosani and Tink continue to redefine endodontics in South Florida—delivering advanced care with compassion, while remaining deeply rooted in their community.
